HART & VICK'S SEEDS FOR FLORISTS AND MARKET GARDENERS

Hart and Vick's Golden Plume Celery on the muck of Wm. Bridgeman, Marion, N. Y.

CARROTS

Chantenay Red Cored—We believe this strain of seed of ours is as good or a little better than others on the market. Certainly it showed up fine, especially with growers in Oswego County of this state, last season. $\frac{1}{4}$ lb., 30c; lb., \$1.00; 5 lbs. or more at 90c per lb.

Imperator—A long, 8-inch, sloping shouldered carrot tapering to a blunt end, smooth and deep rich orange in color. Flesh rich orange, indistinct core, fine grained, high quality. Tops medium and strong enough for bunching. This is the carrot that is shipped from California to eastern markets. $\frac{1}{4}$ lb., 35c; lb., \$1.25; 5 lbs. or more at \$1.15 a lb.

Morse's Bunching—Tops short; foliage rather coarsely cut; stems medium size and strong. Roots at maturity are $1\frac{1}{4}$ to $1\frac{1}{2}$ inches in diameter and 8 inches long, almost cylindrical with rounded shoulders, stump-rooted. A splendid bunching carrot for long distance shipping. $\frac{1}{4}$ lb., 35c; lb., \$1.25; 5 lbs. or more at \$1.15 a lb.

Nantes Improved—A specially fine strain of that popular bunching market carrot. 6 to 7 in. long, cylinder shape, blunt ends, orange flesh of high quality, strong tops of medium length. $\frac{1}{4}$ lb., 45c; lb., \$1.50; 5 lbs. or more at \$1.35 per lb.

Streamliner—New bunching carrot for shippers and market gardeners. Tops short, dark green, and strong. Roots long, slender, cylinder shaped. 8 to 10 in. long. Color deep orange, red cored. $\frac{1}{4}$ lb., 45c; lb., \$1.45; 5 lbs. or more at \$1.35 per lb.

Supreme Half Long—A new variety with very little core. Similar to Danvers but more slender and longer. Skin is a good bright orange and flesh firm and of splendid quality. It has shown up very well indeed in many trials. $\frac{1}{4}$ lb., 45c; lb., \$1.45; 5 lbs. or more at \$1.35 per lb.

CAULIFLOWER

Early Snowball (Special CC-730)—We have reason to believe from the reports brought to us by Cauliflower growers who use this seed year after year that it is far above the average Early Snowball seed offered. It matures early and evenly. The pure white heads are remarkable for their great depth and unexcelled white color and do not become "soft" or "riey" and you will not find any with green leaves in them. $\frac{1}{2}$ oz., 85c; oz., \$1.45; $\frac{1}{4}$ lb., \$5.50 lb., \$20.00.

Improved Super Snowball—A variety making a very large, deep, solid, snow white head. The heavy upright growing leaves are very numerous and being close together force the small inner leaves to curl over and protect the head. Most cauliflower growers are always looking for something a little better. Here it is. $\frac{1}{4}$ oz., 75c; $\frac{1}{2}$ oz., \$1.35; oz., \$2.25; $\frac{1}{4}$ lb., \$8.00.

Snowdrift—A few days later than Snowball. Large, solid deep headed. Several Cauliflower growers have told us it is the best they have ever raised. $\frac{1}{4}$ oz., 45c; oz., \$1.45; $\frac{1}{4}$ lb., \$5.50.

CELERY

Golden Plume (Wonderful)—This is the best early yellow celery and our Special Strain as fine as any in the country. The stalks are large, thick and solid, and the edible portion unusually long. The plants are compact, full-hearted and blanch readily. We are very proud of this Special Strain of Golden Plume. We know it will please the most critical celery grower. We offer two types of this celery, **Tall Golden Plume** and **Medium High Golden Plume**. Oz., 65c; $\frac{1}{4}$ lb., \$2.25; lb., \$8.00.

Supreme Golden—New tall Golden Self Blanching later than Golden Plume and a little taller. Long jointed broad thick stems, and a very good heart. $\frac{1}{4}$ oz., 40c; oz., \$1.25; $\frac{1}{4}$ lb., \$4.25; lb., \$15.00.

Golden Self-Blanching. The Old Dwarf Growing, Long Keeping Kind—This is the most popular late variety. The stalks are thick and solid and the stocky plants have large, solid hearts. Celery growers have found our strain of this kind very good. We can fully recommend it to you. Oz., 65c; $\frac{1}{4}$ lb., \$2.25; lb., \$8.00.

Utah or Salt Lake—A splendid green celery. Sturdy, compact plants, exceptionally solid with broad, thick, rounded stems, crisp and of very high quality. The plants are of medium height and have a heavy heart. Oz., 65c; $\frac{1}{4}$ lb., \$2.25; lb., \$8.00.

HART & VICK'S SEEDS FOR FLORISTS AND MARKET GARDENERS

LETTUCE

New York No. 515—A strain of "California Iceberg" that will produce large, firm, round heads here in the East. Grow this kind on upland; it will not do well on the muck. $\frac{1}{4}$ lb., 60c; lb., \$2.00; 5 lbs. or more at \$1.85 per lb.

Imperial 44—The very best "Iceberg" type head lettuce for the eastern part of the country and does well on both muck and dryland. The head is of good size, good quality, very solid, and is resistant to tip-burn. The seed we offer you is grown for us by the outstanding lettuce seed grower in the country. You can depend on it. The seed is white. Oz., 30c; $\frac{1}{4}$ lb., 85c; lb., \$2.75; 5 lbs. or more at \$2.50 a lb.

Imperial 847—There are some lettuce growers who prefer this kind to Imperial 44. Last season we saw several mighty good pieces of 847 that brought very good money. With most growers, however, 44 does much better. A trial of both will soon tell you which is best for your land. The seed is black. Oz., 30c; $\frac{1}{4}$ lb., 85c; lb., \$2.75; 5 lbs. or more at \$2.50 a lb.

White Boston (Large Frame)—Our customers in New York State have been growing this for several years very successfully. It is as fine a strain of the large headed, big framed white Boston as there is in the country. $\frac{1}{4}$ lb., 50c; lb., \$1.75; 5 lbs. or more at \$1.50 a lb.

Fred Metcalf of Irondequoit has just taken a beautiful crop of Grand Rapids U. S. No. 1 out of this house. Here are more plants just set out for another crop.

READ THIS ARTICLE TAKEN FROM BULLETIN NO.
122 OF THE NEW YORK STATE COLLEGE
OF AGRICULTURE

"A few houses are now stamping stock numbers on all packages that go out. This marks a real advance in seed merchandising. Seed users should make record of these stock numbers, and observe type and performance very carefully. Future seed orders may then be placed, with both buyer and seller assured that they are talking about the same stock as well as the same variety. Your reference to the mark on the package you received last season tells the seedsman what he sent you and he is guided accordingly in filling your order for this year."

You will find stock numbers on every package of vegetable seed you get from Hart & Vick. Keep a record of them for future seed orders.

SEEDS OF ANNUAL FLOWERS

Where quantities smaller than Trade Packages are wanted we can supply retail packages as offered in our Retail Seed Book at at discount to Commercial Growers of 25%.

We fully realize how important it is that the Florist receive the very best strains obtainable and we spare no pains or expense in procuring them for him. Our seeds are as fine as can be grown by the most expert flower seed growers in this country and in Europe.

Wilt Resistant Asters

We recommend all Aster growers, whether they have been bothered with disease or not, to use "wilt-resistant" seed wherever possible. We feel sure that by sowing "wilt-resistant" seed many disappointments due to Aster crop failures will be eliminated. No grower, that we know of, would think of using ordinary Aster seed, after once having used "Wilt-Resistant."

QUEEN OF THE MARKET ASTERS Wilt-Resistant Seed

Long, narrow, curled, and interlaced petals make up these very large, very double flowers, that are somewhat similar to Giants of California, Crego and Rochester.
